Nov 15	Stormwater Discharge Monitoring Report		●			

More 2025 reports and deadlines on back

Note: This is not an exhaustive list of reporting deadlines. Facility-specific requirements and deadlines may vary. Trinity suggests checking with local regulators for submission deadlines. Submit or postmark reports by the due date for on-time consideration. If due date falls on a weekend or holiday, Trinity recommends you submit or postmark the prior business day.

¹ Title V semi-annual and annual compliance reports due dates may be based on Title V permit issuance date. Refer to your Air Operating Permit for more details.

² Due every even numbered year. (For example, a report due by March 2024, would be activities from calendar year 2023). This requirement is fulfilled through the Dangerous Waste Annual Report in this state.

³ Annual emission inventory reporting due dates for local air agencies vary. For example, June 30 for PSCAA and March 15 for SWCAA.

Due Dates	Washington Environmental and Sustainability Reports	Air Data	Water Data	Waste Data	Chemical Data	Energy Data
TBD	CDP (previously known as Carbon Disclosure Project)	●	●	●	●	●
TBD	TSCA CDR Report ⁴				●	
TBD	PFAS Requirements (one time report under TSCA) ⁵				●	

Note: This is not an exhaustive list of reporting deadlines. Facility-specific requirements and deadlines may vary. Trinity suggests checking with local regulators for submission deadlines. Submit or postmark reports by the due date for on-time consideration. If due date falls on a weekend or holiday, Trinity recommends you submit or postmark the prior business day.

⁴ Manufacturers (including importers) are subject to the reporting requirements based on manufacturing (including importing) activities conducted during the reporting period. This report is required every 4 years. The last report was due in 2024. The next report will be due in 2028 (covering reporting years for 2024 through 2027).

⁵ PFAS reporting under TSCA Section 8(a)(7) is also due in January 2026 which covers import and manufacture of PFAS from 2011 to 2022. This is a one-time data gathering and reporting requirement separate from CDR. While similar to CDR in many ways, the PFAS reporting is much more extensive and does not exclude articles, de minimis concentrations, or low levels of activity.
